in 2019 - 2022.

STEAM in early childhood – simple and fun

Kindergarten
and school canteen
Chotětov

Forest Kindergarten Nad Klenicí, z.s., Mladá Boleslav

Nad Klenicí Forest Kindergarten is for preschool children from Mladá Boleslav and the surroundings. The principle of our actions is to lead children to responsibility, respect for themselves and others, to support children's relationship to the place where we live and to get to know the environment by experiencing the changes of seasons, weather and changes during the day. We emphasize the well-being of children, a healthy lifestyle, exercise and good interpersonal relationships.

Motto:

„Nature to children, children to nature!“

More here: www.nadklenici.cz

Kindergarten and school canteen Chotětov and Hřivno

The kindergarten is four-class with a total capacity of 88 children. The kindergarten has a separate workplace in Hřivno.

Children are educated according to the school educational program "I like nature".

Motto:

"It goes, the machine goes, it rings in nature, the animals are friends, we love them all year round".

„I really learned everything I really needed in kindergarten.“

Robert Fulghum

Eco-kindergarten Rozárka, Praha

Rozárka Kindergarten is a smaller kindergarten with a friendly atmosphere. What are we doing in Rozárka with the children? We are out in any weather, we create and play music, we plant herbs and vegetables, we pay attention to nature during the seasons, we play freely, we eat healthily. We discover the world at our own pace. We are inspired by the elements of the Start Together program. We are involved in the Eco-school program for kindergartens, which blends into all our activities. You will find our branches in Prague 7 in Troja and in Letná.
